

## CITY OF SUNRISE

### SAWGRASS WWTP REUSE FACILITY

#### **LOCATION:**

Sunrise, FL

The City of Sunrise conducted a Reuse Feasibility Study that determined a reuse water treatment facility would provide a solution to regulatory and customer needs. Based on this finding and other subsequent studies, Primoris Water & Mechanical constructed a 2MG expandable reuse side stream secondary effluent to tertiary reuse standards. This new reuse facility was constructed adjacent to the Sawgrass utilities water and wastewater.

Founded in 1960, Primoris Services Corporation (Primoris) is the parent company of an array of vastly diversified infrastructure construction and engineering firms uniquely positioned to bid, design, innovate, build, and deliver in diverse end markets. Through its subsidiaries, Primoris provides a wide range of construction, fabrication, maintenance, and engineering services to major public utilities, petrochemical and energy companies, and municipalities. At Primoris, the health and safety of our employees is our top priority. Primoris is headquartered in Dallas and is a publically traded company on NASDAQ under: PRIM.

With offices throughout Florida and Texas, Primoris Water & Mechanical is comprised of two groups: Mechanical and Water. Our Mechanical group serves the niche market of installing underground hydronic piping (chilled water, hot water, steam, and condensate) systems. We service a wide variety of universities, hospitals, airports, and private companies across the southern United States. Our Water group has been in the business for over 30 years delivering construction and rehabilitation projects of water and wastewater treatment facilities through Design-Build, Design-Bid-Build and Construction Management at Risk contracts.
