

LOCATION:
El Segundo, CA

Replacement of the existing El Segundo Generating Station (ESGS) Units 1 and 2 with a natural gas-fired combined cycle electric generation facility.

The new combined cycle is designed to generate 550 megawatts (MW) under nominal conditions. The project used Selective Catalytic Reduction (SCR), a dry, low NOx combustor and an oxidation catalyst system to reduce air emissions.

Construction of concrete foundations, electrical duct banks, all piping systems, two Siemens gas turbines each with a single pressure HRSGs and two Siemens steam turbines with air cooled condensers. Four GSUs, auxiliary transformers, electrical rooms, gas compressors, and other required Balance of Plant (BOP) support equipment.

Founded in 1960, Primoris Services Corporation (Primoris) is the parent company of an array of vastly diversified infrastructure construction and engineering firms uniquely positioned to bid, design, innovate, build, and deliver in diverse end markets. Through its subsidiaries, Primoris provides a wide range of construction, fabrication, maintenance, and engineering services to major public utilities, petrochemical and energy companies, and municipalities. At Primoris, the health and safety of our employees is our top priority. Primoris is headquartered in Dallas and is a publicly traded company on NASDAQ under: PRIM.

ARB Industrial, a subsidiary of Primoris, provides a comprehensive range of services for industrial plants and facilities. ARB Industrial is experienced in power generation, renewable energy and energy storage, the refinery and chemical industries, water and wastewater, oil and gas, and alternative fuels. We are a leader in performing difficult fast track projects. Services include full EPC project delivery, turnkey construction, retrofits, upgrades, repairs, outages, and maintenance. ARB Industrial is headquartered in Lake Forest, California, and has other offices in Bakersfield, California, and Pittsburg, California.
