Shaft excavations, shoring and the installation of two (2) 110-inch diameter, 825 feet long rib and lag tunnels for two (2) water lines and a sewer line of varying diameters to service a new semiconductor manufacturing facility. The project required day and night shifts with a wheeled tunnel boring machine (TBM) to progress through the caliche, rock and cobble encountered along the tunnel horizon.

Founded in 1960, Primoris Services Corporation (Primoris) is the parent company of an array of vastly diversified infrastructure construction and engineering firms uniquely positioned to bid, design, innovate, build, and deliver in diverse end markets. Through its subsidiaries, Primoris provides a wide range of construction, fabrication, maintenance, and engineering services to major public utilities, petrochemical and energy companies, and municipalities. At Primoris, the health and safety of our employees is our top priority. Primoris is headquartered in Dallas and is a publicly traded company on NASDAQ under: PRIM.

Pipe Jacking Trenchless (PJT) has served the U.S. tunneling and boring market for over 30 years. We specialize in trenchless installations for power, communication, water, wastewater, storm drain, oil and natural gas. PJT has the equipment and personnel to tackle any sized job and handle any type of ground conditions. Our capabilities range from high precision pilot tube installations and traditional auger boring installations to tunnel installations up to 12 feet in diameter as well as horizontal directional drilling and pit excavations.
