

GREENDALE OVERHEAD TO UNDERGROUND CONVERSION MILWAUKEE METRO AREA

LOCATION:
Milwaukee Metro Area

Scope of Work: Convert Greendale neighborhood to 24.9kV system, install 7.8 miles of underground primary cable, install 1 mile of new underground secondary cable, transfer all customers to new system and remove 4.5 miles of existing overhead distribution lines. This is a 1.5 million dollar project to convert electric distribution facilities from Overhead to Underground. The project was very successful, customer satisfaction was very high, our field leaders worked very diligently to schedule and coordinate all work and outages with local customers to limit disruptions and accommodate special needs. We experienced challenges with underground utility locating as the worker shortages have also affected this group. We worked closely with the owner and state agencies to develop schedules that could be accommodated by the locating group.

Founded in 1960, Primoris Services Corporation (Primoris) is the parent company of an array of vastly diversified infrastructure construction and engineering firms uniquely positioned to bid, design, innovate, build, and deliver in diverse end markets. Through its subsidiaries, Primoris provides a wide range of construction, fabrication, maintenance, and engineering services to major public utilities, petrochemical and energy companies, and municipalities. At Primoris, the health and safety of our employees is our top priority. Primoris is headquartered in Dallas and is a publicly traded company on NASDAQ under: PRIM.
