

SWEETWATER, TEXAS

SWEETWATER DISTRICT ENERGIZED TRANSMISSION WORK

LOCATION:
Sweetwater, TX

The Sweetwater energized transmission work included replacing two 138kV “H” structure cross arms and insulators on a 138kV circuit. On the 69 KV circuit, one pole, cross arms and insulators on a 69kV circuit “H” structure were replaced. 11 cross arms and two poles were replaced on another 69kV circuit. The project was completed a day ahead of the due date and was performed safely with no personal injuries or equipment damages. The work repaired damaged or extremely aged equipment that was at end of life ensuring continued reliable service for the customers served by the circuits. This project was completed with employees new to energized operations. The daily communication and care for each person ensure the successful safe completion of the project.

Founded in 1960, Primoris Services Corporation (Primoris) is the parent company of an array of vastly diversified infrastructure construction and engineering firms uniquely positioned to bid, design, innovate, build, and deliver in diverse end markets. Through its subsidiaries, Primoris provides a wide range of construction, fabrication, maintenance, and engineering services to major public utilities, petrochemical and energy companies, and municipalities. At Primoris, the health and safety of our employees is our top priority. Primoris is headquartered in Dallas and is a publically traded company on NASDAQ under: PRIM.

Primoris T&D provides a broad range of services for the electric, natural gas, and telecommunications industries including electrical engineering and design for transmission and distribution facilities, maintenance and construction of electric and gas T&D facilities, and repair and restoration of utility electrical infrastructure.
