WASTEWATER RECLAMATION FACILITY DESIGN-BUILD EXPANSION

Primoris Water & Mechanical is working on a Design/Build expansion of the WWRF to a permitted capacity of 10.5 MGD on an AADF. The scope of work includes a new aeration basin, modifications to the existing 4 aeration basins, modifications to the existing blower building, a new clarifier, modifications to the existing sludge pumping station, a new injection well pump, and replacement of the existing plant PLC network.
